Science 8	Name	
Changes: Yeast	#2 Budding of Yeast	Block

1.	a. Define budding (as a form of reproduction):
_	Source:
	b. Budding is a form of(sexual or asexual?) reproduction.
2.	Make a wet mount slide of yeast that has had warmth and food.
	a. Start with a clean slide and clean cover slip.
	b. Place a small drop of yeast/food mixture on the slide.
	c. Holding the coverslip at a 45° angle, drop it carefully over the yeast.
	d. Gently tap the coverslip to help remove air bubbles.
3.	Focus, using slide clips, with a compound microscope.
4.	Locate yeast that are in the process of budding. Have checked
5.	Use a pencil and the paper below to draw at least one parent yeast with bud.
6.	Label with a title. Using a straight line to the right hand side, label parent and
	id. Write the magnification you used followed by an X.
7.	>>>>>> Have checked for points. Then clean up.
